VIDEO SYNCH
PACKAGE
PRESENT WITH POWER

SAVE TIME WITH SYNCHRONIZATION

Create and present deposition video clips on-the-fly with Veritext's easy to use video synch package powered by YesLaw. Keyword search, highlight, create, edit and share clips — ready for the courtroom — directly from your video synchronized transcript.

Delivered in flexible formats that works seamlessly with popular multimedia players such as Windows Media Player, VLC, QuickTime and many others.

VERITEXT
LEGAL SOLUTIONS

INSTANT CLIP CREATION
Focus on the evidence, not the technology. Create video clips by simply highlighting transcript text.

ORGANIZE & HIGHLIGHT
The video transcript management tools include multi-color highlighting to mark transcript passages for further attention or color code passages to identify issues, priorities, or team-member assignments.

ANNOTATIONS
Stickynote style annotations identify issues, flag items for follow up, assign tasks to team members, share notes with others or simply mark a line to find it quickly later.

EXHIBIT LINKS
Hyperlink exhibits to transcript text to recall with a click. The exhibit files can be located on a shared network resource.

COLLABORATION
Email your annotations, highlights, linked exhibits, and video clips to others or save your work to a shared server.

NO DOWNLOADS NECESSARY
With the Veritext's player-editor software there is no other software required to purchase, download, install or manage.

PRESENTATION MODE
It's courtroom ready! No additional software is required to play selected testimony full-screen with subtitles. In full-screen presentation mode, a pop-up menu enables single click access to all the edited video clips.

SIMPLE EXPORT TO TRIAL PRESENTATION SOFTWARE

Simply highlight the transcript text to edit video clips and export directly to your preferred presentation software.

- **Sanction**
- **Trial Director**
- **LiveNote**
- **Summation**
- **Case Notebook**
- **TextMap**
- **PowerPoint**
